Skills

Languages: HTML, CSS, LESS/SCSS, Tailwind CSS, Bootstrap, JavaScript, Jquery, Web Accessibility (WCAG)

Technologies & Tools: React JS, Redux, Git, UI Design, Responsive Design, ChatGPT (Faster Development), Figma, Jira, Agile, Jenkins

Work Experience

Wavemaker India Pvt. Ltd   Apr 2023 - Present

UI Developer

- Developed reusable and modular React components using functional components and Hooks (useState, useEffect).
- Developed responsive and user-friendly web interfaces ensuring seamless functionality across devices and browsers.
- Designed responsive web and mobile UI screens based on Figma prototypes, ensuring visual consistency, accessibility, and brand alignment.
- Enhanced web and mobile application functionality using custom JavaScript for dynamic UI interactions and improved user experience.
- Optimized website accessibility by adhering to WCAG guidelines resulting in improved user experience for individuals with disabilities.
- Utilized jQuery to simplify complex DOM operations, handle events efficiently, and create smooth UI transitions.
- Created UI wireframes, high-fidelity designs, and interactive prototypes using Figma.
- Used version control systems for code collaboration, tracking changes, and managing project versions effectively.
- React, UI Design, HTML, CSS, JavaScript, JQuery, React, Bootstrap, Tailwind CSS, LESS, Git, Jira, Jenkins.

Pramati Software Private Limited   Jul 2021 - Mar 2023

UI/UX Developer

- Converted Figma prototypes into structured HTML, CSS, and JavaScript components while maintaining design integrity and responsiveness.
- Integrated REST APIs using fetch Method, handling loading states, error states, and data caching using ReactJS
- Created reusable CSS components, variables, and mixins using SCSS/LESS for scalable styling.
- Created mobile-first layouts using modern CSS techniques such as Flexbox, Grid, and responsive typography.
- Reduced CSS duplication and improved maintainability by organizing styles into component-based architecture.
- React, HTML, CSS, Figma, Bootstrap, Javascript, Git, Jenkins, Agile.

iMedrix Systems Pvt Ltd   Dec 2018 - April 2021

Frontend Developer

- Translated UI/UX design wireframes into functional, responsive web pages ensuring pixel-perfect accuracy and consistent visual standards.
- Applied responsive web design techniques using CSS Flexbox, and media queries to deliver seamless experiences on desktop and mobile.
- Conducted UI testing and debugging to maintain quality and ensure pixel-perfect and error-free deployment.
- HTML, CSS, JavaScript, UI Debugging, Git, Jenkins, Agile.

Education

SDM Institute of Technology, Ujire, Karnataka   Jul 2012 - May 2015
B.E. in Electronics and Communication Engineering

SDM Technical Institute (Polytechnic), Ujire, Karnataka   Jul 2009 - May 2012
Diploma in Electronics and Communication Engineering

Project Work

Food Web Application using React
- Developed a responsive Food Web Application using React with a focus on clean, reusable, and maintainable functional components following the Single Responsibility Principle (SRP).
- Implemented core React Hooks such as useState, useEffect, and useParams for efficient state management, lifecycle handling, and dynamic routing.
- Created and utilized Custom Hooks to encapsulate reusable logic, including an Online/Offline network status feature to enhance user experience.
- Integrated React Router for seamless client-side navigation between multiple pages without full page reloads.
- Implemented API data fetching and dynamically rendered restaurant and food data on the UI with proper loading states.
- Designed and implemented a Shimmer UI (Skeleton Loader) to improve perceived performance during data loading.
- Configured and styled the application using Tailwind CSS, ensuring a modern, responsive, and utility-first design approach.
- Possess working knowledge of Class-Based Components and lifecycle methods, with hands-on experience primarily in functional components.
- Used: ReactJS, JSX, API, JavaScript, Accessibility, Tailwind CSS, Git, Jira,

Banking and Financial Services Applications
- Worked on enterprise-level US Web and Mobile banking applications.
- Developed secure and responsive web interfaces for banking and financial services applications, ensuring data integrity and compliance with industry standards.
- Applied UI branding and theming across multiple banking applications to maintain consistency with corporate design guidelines.
- Used: HTML, SCSS, JavaScript, Jquery, Accessibility, Git, Jira, Agile, Jenkins.

Figma UI Design and Prototyping (Food and Recruitment Dashboard Web Application):
- Designed a complete UI for a Food Delivery App, covering the full flow from splash screens to item selection, ordering, and payment. Developed a clean, minimal Figma prototype focusing on intuitive navigation, simple layouts, and a seamless ordering experience.
- Designed a web-based recruitment management dashboard UI focused on hiring workflows such as applicant tracking, interviews, training, and onboarding.
- Designed reusable UI components and layout patterns to ensure consistency and scalability across the application.
- Tools Used: Figma, Userflows, UI Design, Design Systems, Prototyping, Responsive Design, Accessibility (WCAG).

Personal Portfolio Website
- Developed a responsive and visually appealing portfolio website to showcase projects and skills.
- Enhanced UI/UX by designing intuitive navigation, sections, typography, and color schemes to match personal branding.
- Used: HTML,CSS, Jquery, Responsive Design.
- Website Link: https://nishanthtnoorithaya.github.io/PortFolio/

Awards and Certificates

- **Workshop on Front-End Development from HTMLHints** Helping students and working professionals to get better at Frontend coding (HTML,CSS, JavaScript) and UI Design(Figma).
